

Memphis MXA62TG – 6.5in

MXA62TG 6.5" clamp mount tower speakers produce exceptional sound in outdoor environments. Memphis utilizes compression horn technology to cast powerful sound out across the lake or trail. Our tower speakers sound phenomenal on the boat or while at the end of a ski rope. These speakers are designed to resist water and elements and are UV rated for protection from the sun. The ez-swivel mounting system makes adjusting the speakers simple allowing for 360° swivel action. MXA62TG tower speakers feature RGB LED Lighting to keep the party going when the sun goes down! Bolt these towers to a ski rack or side by side and be the envy of the cove or the trails. The MXA62TG are sold in pairs and sports a durable gunmetal finish.

- Gunmetal finish
- Compression horn tweeter
- Water, element and UV resistant housing
- Adjustable aluminum mounting hardware
- EZ Swivel mount fits bars 1.75"-3" and swivels 360°
