

# Memphis MXA69L - 6x9in LED

MXA69L speakers are water and element resistant and designed to perform in extreme environments. From boats, to powersports equipment to off-road vehicle, These 6x9" speakers provide amazing sound and deep bass even in open air environments. MXA gear is UV coated to withstand the harsh sunlight for long days on the lake or trails and are salt tested for corrosion for ocean applications. The MXA69L ships with protective grills in both gunmetal and white with removable protective mesh inserts. Each set of MXA69L speakers features integrated RGB LED technology to bring your equipment to life when the sun goes down.

- Both gunmetal and white grills ship standard with speakers
