

# Memphis MXA82TW – 8in

MXA82TW 8" clamp mount tower speakers produce exceptional sound in outdoor environments. Memphis utilizes compression horn technology to cast powerful sound out across the lake or trail. Our tower speakers sound phenomenal on the boat or while at the end of a ski rope. These speakers are designed to resist water and elements and are UV rated for protection from the sun. Our ez-swivel mounting system makes adjusting the speakers simple allowing for 360° swivel action. This monster 8" towers ship with color changing RGB LED light rings built into them so you can keep the party going all light. Bolt these towers to a ski rack or side by side and be the envy of the cove or the trails with massive Memphis sound. The MXA82TW is sold in pairs and sports a durable white finish.
