

# Memphis MXAMCAPP - App Controlled "Headless" Source Unit

The MXAMCAPP give you all the power and functionality of a traditional source unit without requiring a cut out for a radio. This unit is a hideaway black box that packs all the features of a traditional radio. The interface is connected via Bluetooth to your phone. This "Headless Unit" is ideal for powersports, marine and classic car applications where it is difficult to find a mounting location for a traditional radio. The MXAMCAPP features a built-in 50w x 4 amplifier with 6 source options and front/rear/subwoofer RCA outputs allowing you to build an entire system directly off this unit. The sources include AM/FM/Bluetooth/Weather band/USB/AUX. The hideaway box is controlled via the Memphis App allowing you to control and adjust your EQ settings, AM/FM presets, adjust RGB LED lighting and more. This unit features an optional attached wire remote which fits in standard carling knock out locations allowing you to have quick access to traditional features like volume, track skip, source , play/pause and more.
